

THE ROAD TO PERFECT DELIVERY WITH ePOD

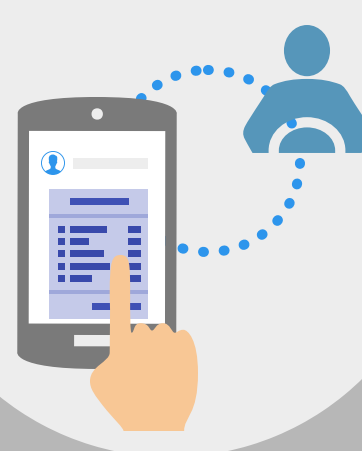

1

Dispatcher log into ePOD app and import orders through integration

2

Dispatcher creates job list and assign orders to driver

3

Driver log into epod app, receives job list and carries the task

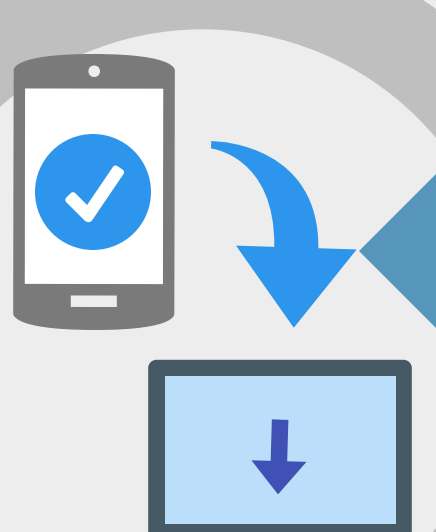

4

At delivery point, driver updates the job status and performs epod

5

Real time data sync - updates closed job status in ERP

6

Driver continues the journey until all of the deliveries are made
